

## Jan Byška

### *Postdoctoral Fellow*

*Department of Informatics, University of Bergen*

Jan Byška is a postdoctoral fellow at the University of Bergen and Assistant Professor at Masaryk University. His work focuses on various challenges in the field of visualization of biomolecular and time-dependent data. Together with his colleagues, he develops multiple software tools for the visualization of molecular data among the most notable CAVER Analyst.

He received his master's degree in Computer Graphics from the Masaryk University, Brno in 2011 and his Ph.D. in 2016 from the same university. Since finishing his Ph.D., Dr. Byška is actively participating in the organization of multiple scientific events in the field of visualization (VCBM, EuroVis, BioVis, MolVA).
