

Bruno Figueiredo

Chief Officer and Head of R&D

Graphenest

Bruno Figueiredo is Graphenest's Chief Operating Officer and Head of R&D. He is a chemical engineer Ph.D. that has the ability to solve any problem related with reactions and separation processes.

He was elected as member of the 2017 Industry class at Forbes 30 under 30.

His main interests are related with the synthesis and characterization of known and novel materials. He has a strong aptitude to work with engineering software and laboratory teams. He is specialized in Graphenest's process, and his responsibilities include continuous improvement of the production system and its inputs (liquid and solid raw-materials).

Bruno Figueiredo is now leading the way in adding to the unit to produce other forms of graphene, GO, and rGO, as well as the production of graphene-based materials.
